

PUSHPENDER KUSHWAHA

Software Developer

Experienced Web Developer skilled in advanced web development, testing, and debugging with a strong foundation in React.js, React Native, and Node.js. Proven ability to deliver high-quality solutions through seamless API integration, performance optimization, and adherence to best coding practices. Collaborative team player with a passion for continuous learning and staying up-to-date with emerging technologies.

EDUCATION

Master of Computer Applications (MCA)

Amity University, India

08/2021 - 05/2023

Bachelor of Computer Applications (BCA)

Guru Gobind Singh Indraprastha University, India

08/2018 - 06/2021

WORK EXPERIENCE

Software Developer

Pie Infosystems - Software Development Company

11/2021 - Present

Gurugram

Achievements/Tasks

- Conducted reviews of application requirements and API integration requirements for various projects, ensuring seamless execution.
- Deepened understanding of best practices and emerging trends in React.js development through continuous learning and application in real-world projects.
- Worked on the Toywala Project, implementing new functionality and integrating new APIs across three distinct e-commerce and administration platforms.
- Led the development of projects at Grist India, designing, implementing, and testing various features while maintaining high-quality code standards.
- Worked on the Dailly Project, implementing new functionality and integrating new APIs across three distinct websites for customers, vendors, and administrators.
- End-to-end development of the Pepfuels React Native mobile application for iOS and Android, successfully integrating the back-end and implementing the Razorpay payment gateway.
- Demonstrated proficiency in React Native in the Vosita Project, designing the application and integrating APIs while optimizing performance through the Redux Toolkit.
- Worked on .NET for an asset management project, utilizing microservices and developing APIs for the backend, gaining basic knowledge in Angular for the front-end.

TECHNICAL SKILLS

Front-end: React.js (Redux, React Hooks, React Router), React Native, Next.js, Angular, JavaScript (ES6+), HTML5, CSS3

Back-end: Node.js (Express.js), .NET (C#, ASP.NET Core Basic) , RESTful APIs, GraphQL

Databases: MongoDB, SQL Server, Postgres

Tools & Technologies: Git, Jira, Postman, Figma, Firebase

PROJECTS

Microsite

- Developed an admin panel to create and manage new survey websites. Responsibilities included managing code, adding new features for form creation, creating webhooks for data submission and lead generation, monitoring leads, and sending leads to clients based on survey responses.

Dailly Project

- Implemented new functionalities and integrated new APIs across three distinct websites for customers, vendors, and administrators using Redux Query, alongside other third-party packages such as Tailwind CSS and component-based UI. .

PepFuels

- End-to-end development of the React Native mobile application, integrating the back-end and implementing the Razorpay payment gateway for iOS and Android.

Grist India

- Led the development of projects, designing, implementing, and testing various features using Redux Toolkit, enhancing customer/producer interactions and admin capabilities.

Toywala

- Worked on implementing new functionality and integrating new APIs across three distinct e-commerce and administration platforms.

Vosita

- Designed the React Native application, integrated APIs, and optimized performance through the Redux Toolkit.

Bemoved

- Collaborated with the development team to discuss integration and project flow.

Immenzza CRM

- Contributed to the development of this project.
